Professional Summary:
Software Engineer with over one year of professional experience developing full-stack applications and business process automation solutions using Laravel, React, ASP.NET Core, and Microsoft Power Platform. Experienced in API integrations, automated testing, troubleshooting, and staging and production deployments.

Education:
- BS, Information Technology, Bukidnon State University, PHL, 06/2025

Technical Skills:
- Programming:
  - PHP, JavaScript, TypeScript, Java, Python (Basic), SQL
- Frontend:
  - React, Vue.js, Material UI, HTML, CSS
- Backend:
  - Laravel, ASP.NET Core, Node.js, NestJS
- Automation and Integration:
  - Power Apps, Power Automate, SharePoint, REST APIs, Microsoft Graph, OAuth 2.0
- Testing:
  - PHPUnit, Playwright
- Database/Tools:
  - MySQL, PostgreSQL, Git, Docker, AWS (EC2, RDS, CloudWatch), SSH

Strengths:
- Excellent communication skills to present points precisely and clearly
- Excellent team player with strong interpersonal skills to coordinate and work independently or within a team
- Motivated and always willing to learn new things
- Good problem-solving and analytical skills to solve problems efficiently

WORK EXPERIENCE:

SOFTWARE ENGINEER
Sprobe Inc., Cebu Business Park IT Tower 2, Cebu City, PHL June 2025 - Present

- Developed and maintained full-stack business applications using Laravel and React including memo editing, meeting summaries, email history, approval enhancements, and CSV import/export.
- Improved application reliability through data validation, normalization, document previews, responsive Material UI interfaces, and PHPUnit tests; maintained a business continuity training platform by resolving workflow, account, email, export, and role-based UI issues.
- Enhanced an ASP.NET Core and React application template with bulk user deletion, automated email verification, Playwright end-to-end tests, and observability features.
- Implemented Microsoft Graph OAuth 2.0 integration for Laravel outbound email, including secure token handling, bounded retries, and PHPUnit test coverage.
- Migrated an Electron/Vue.js screen-sharing feature to the updated SkyWay API, preserving SFU video delivery and resolving cursor-event communication issues.
- Investigated production AWS RDS CPU spikes using CloudWatch metrics, EC2 activity, and Linux/Nginx logs; performed staging and production deployments using SSH and Docker, including application validation and troubleshooting.
- Developed and enhanced a Power Platform leave request system using Power Apps, Power Automate, and SharePoint, implementing role-based access, configurable multi-stage approvals, and automated notifications.
- Built an internal skill-management prototype using Power Apps, Power Automate, and SharePoint, implementing employee skill/project tracking and automated reminder workflows.
